

# **Administering SDOH Screening Tools With Ag Workers And Their Families**

Virtual Learning Event: Tuesday, July 19, 2022, 1-2pm, PST

# Welcome

Mic

Please mute when not speaking.

Camera

Cameras are encouraged.

Reactions

Interact and raise your hand with reactions.

Chat

Participate in discussion in the chat.

*This learning event is being recorded.  
Recording and slides will be shared.*

# BACKGROUND

The Association supports community health centers to establish and maintain social needs screening programs to connect clients to needed resources and better inform care leading to improved health outcomes and lives for clients.

We host a monthly Social Determinants of Health Workgroup to enable peer discussion, share best practices and challenges and training on helpful topics.

Washington  
Association for  
Community Health

*With generous support from the  
Kaiser Foundation Health Plan of  
Washington*

# LEARNING OBJECTIVES

As a result of the training, participants will be able to:

- Discuss the main SDOH factors that impact MSAW populations in their service areas.
- Identify best practices to administer SDOH screening tools with MSAW populations.
- Share tips and strategies to link referrals and resources for MSAW populations

# SDOH Impact on MSAW Population

## Education Access & Quality

- Limited formal schooling
- Low literacy levels

## Economic Stability

- Poverty
- Lack of employment benefits

## Social & Community Context

- Community and workplace barriers
- Immigration system and laws
- Lack of awareness challenges

## Health Care Access & Quality

- Lack of health insurance
- Limited understanding of health system
- Health beliefs and cultural practices
- Limited health care sites

## Neighborhood & Built Environment

- Transportation
- Housing
- Food insecurity

# Best Practices to Administer SDOH Tools & link referrals

Selecting and implementing SDOH assessment tools

Collecting patient-level information related to SDOH

Creating workflows to track and address patient needs

Identifying community-based social service resources and tracking referrals

## *Transforming Complex Care (TCC)*

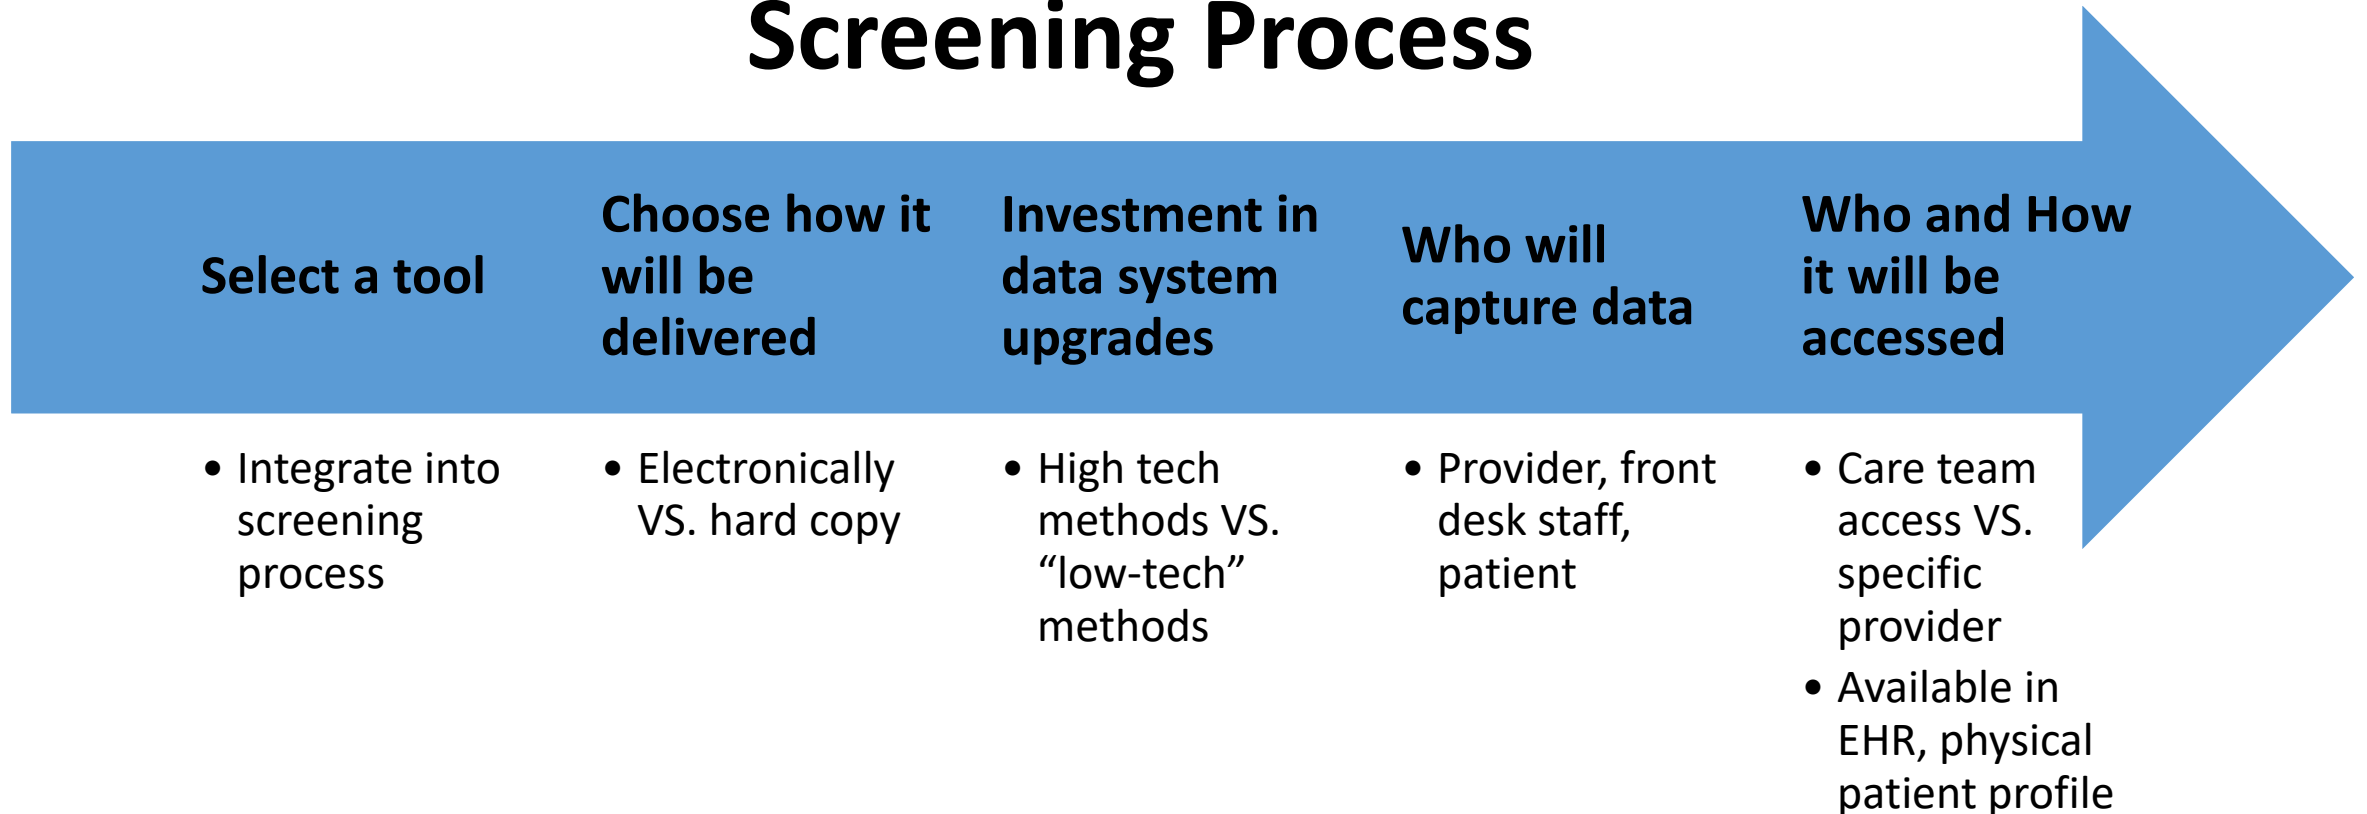

National initiative made possible by the Robert Wood Johnson Foundation and led by the Center for Health Care Strategies.

# Collecting and Integrating Patient SDOH Information

## Screening Process

# Building Rapport/Trust

## Multilingual Staff administering the tool/questionnaire

- If any bilingual staff or contractor is available, reach out to other organizations or to community leaders. They can serve as interpreters.

## CHWs, Outreach Workers

## Building rapport/trust with the community

- Introduce yourself, who you work for, what you/your health center do
- Explain why you are collecting information and how it will help them
- Be a little informal when approaching and create a friendly conversation while doing the assessments
- Let them know that they can call your health center for any additional information

## Using culturally informed terminology

## Cross train staff to administer screener among patients

- Learning how to have an open conversation, because sometimes the screening questions can be very personal.

## Identifying critical community partnerships

# NCFH's SDOH Resource Hub

## [NCFH SDOH Resource Hub](#)

provides health centers:

- Access to available screening tools and resources
- Educational materials
  - Guides
  - Fact sheets
  - Infographics
  - Videos
  - Other resources

### SDOH Screening Tools and Resources

Screening for Social Determinants of Health (SDOH) can help identify specific population needs and identify who may benefit from resources and efforts to reduce health disparities.

*This list contains screening tools and other resources, screening tools are denoted with an (\*) asterisk for easy identification.*
